EDUCATION

Syracuse University, School of Information Studies, Syracuse, NY **May 2025**
Master of Science, Applied Data Science
Relevant Coursework: Introduction to Data Science, Data Admin & database Management, Scripting for Data Analysis, Applied Machine Learning, Quant Reasoning Data Science, Business Analytics, Big Data Analytics, Cloud Management.

University Of Mumbai, Lokmanya Tilak College of Engineering, Mumbai, India **June 2022**
Bachelor of Engineering, Computer Engineering
Relevant Coursework: Database Management System, Artificial Intelligence and Soft Computing, Machine Learning.

TECHNICAL SKILLS

Languages: Python, R, SQL, JavaScript
Data Visualization: Power BI, Tableau, Google Analytics, Looker Studio
Databases & Cloud Platforms: MongoDB, Microsoft Azure, AWS, Google Cloud, Redshift, Snowflake, Big Query
Machine Learning/Statistics: SciKit Learn, TensorFlow, XGboost
Big Data Technologies: Apache Spark, PySpark (MLlib included), Databricks
Other Tools: Power Apps, Microsoft Excel, GitHub Codespaces, Google Colab, JupyterLab, Docker, Trello

WORK EXPERIENCE

Data Analyst Intern, *Bandhouse Music group, Nashville, TN* **May 2024 - Aug 2024**
- Analyzed large-scale streaming and social media data from platforms such as Spotify, YouTube, and Instagram, refining audience engagement strategies and increasing engagement by 15% through data-driven adjustments.
- Designed interactive Tableau dashboards to monitor artist popularity, genre trends, and fan engagement, providing real-time insights that supported informed decision-making.
- Automated data collection using Python and Google Sheets, reducing manual effort by 20% and ensuring data accuracy for reliable analysis.
- Presented weekly insights to the marketing team, boosting streaming numbers by 10% through clear visualization and communication of actionable trends.

Data Analyst Intern, *Aromagasms Cafe*, *Mumbai, India* **Feb 2023 - May 2023**
- Automated order and inventory management processes, increasing operational efficiency by 30% and standardizing data collection methods.
- Conducted statistical modeling and data analysis to identify key drivers of customer satisfaction, leading to a 25% improvement in service quality.
- Utilized SQL and Python scripts for data cleaning and automation, ensuring consistent and accurate data reporting.
- Delivered weekly marketing insights that facilitated data-driven decisions and contributed to enhanced campaign performance

PROJECTS

Airfare Prediction and Optimization with PySpark **Sep 2024 - Dec 2024**
Syracuse University
- Collaborated in a team of 3 to analyze airfare pricing dynamics using big data analytics, focusing on seasonal demand, market trends, and operational costs to inform pricing strategies.
- Led PySpark-based analytics model development to boost data-driven strategic pricing and revenue management.
- Managed Apache Spark-driven data operations, including comprehensive data ingestion, cleaning, and engineering, which facilitated the development of predictive models with Gradient Boosting and Random Forest.
- Delivered a high-performance predictive model with an R-squared of 0.99 and RMSE of 12.60, driving dynamic, data-driven pricing strategies while significantly enhancing airfare prediction accuracy and revenue growth.

Inventory Demand Forecasting **Jan 2024 - Mar 2024**
Syracuse University
- Worked in a team of 4 to build ARIMA and LSTM models for forecasting grocery sales using historical and weather data, improving inventory planning and reducing stock issues.
- Processed and cleaned up over 100,000 records in Python to ensure accurate and reliable forecasting results.
- Performed Exploratory Data Analysis (EDA) to uncover patterns between weather changes and consumer buying behavior, helping optimize stock management.
- Delivered insights that minimized overstock and shortages, boosting inventory efficiency.
